Solar Energy Research Park Sites, Osceola, Florida

Site 1

- Area: 547.8 acres.
- Land Use: Grazing land soil capability Class I (060)
- Distance from Residential Parcels: Greater than 1 mile away.
- Distance to Urban Parcels: Within 1 mile.
- Parcel Shape: Semi-regular.

Site 2

- Area: 636.05 acres
- Land Use: Grazing land soil capability Class I (060)
- Distance from Residential Parcels: 0.5 - 1 mile away.
- Distance to Urban Parcels: Within 1 mile.
- Parcel Shape: Semi-regular.

- Schools (Public, 1 mile)

Selection Description:
Two sites were selected for a new solar energy research park site within Osceola County, Florida. These sites were selected as they are: outside of city limits; less than 1 mile away from major roads; greater than 1 mile away from public and private schools; greater than 1 mile away from aviation facilities; greater than 1,000 ft. away from sinkholes; do not exist within conservation lands; have moderately well soil drainage; are greater than 25 acres; are further than 0.5 -1 mile away from residential neighborhoods; exist on agricultural land; are within 1 mile of urban lands; are regularly shaped (square/rectangular).
